Task:

- Find some scholarly resources for your upcoming “Introduction” (mini)paper.
- Properly cite these resources in the American Chemical Society (ACS) style.

The Difference Between Scholarly & Popular Resources:

- **Scholarly** resources are written for academic audiences (scholars, researchers, students, etc.). Examples of scholarly resources include books in academic libraries and scholarly journal articles. You will find scholarly resources through the Schewe Library website.

- **Popular** resources are written for non-academic audiences. Examples of popular resources include newspapers, magazines, podcasts, and (most) websites. You will find popular resources through Google and the Schewe Library website (in the case of newspapers and magazines, mostly).

Places to Remember (Other than the Schewe Library website):

- [CH 204 Course Page (http://goo.gl/9nGFNS)](http://goo.gl/9nGFNS) -- A page of custom resources just for CH 204 students. Includes relevant databases, a catalog link, citation resources, and a digital copy of your handout. Sweet!
Article Databases (In the “Articles” tab of Schewe’s website / course page):

- **Academic Search Complete** -- A large, easy-to-use articles database.
- **JSTOR** -- Another large and fairly easy-to-use articles database.
- **Combined Search** -- Watch out, this searches most of our databases all at once! Expect a lot of results!
- **American Chemical Society (ACS) Publications** -- All the ACS journals in one place.
- **SciFinder** -- The premier index to chemical literature. Requires a registration at:
  - [http://goo.gl/4oPmZm](http://goo.gl/4oPmZm)

Books (In the “Books” tab of Schewe’s website / course page):

- **Schewe Library Catalog** -- Our online catalog, where you find books, videos, etc.

Citation Resources (Linked in your course page):

- **Zotero** -- A reference management software, that is best used (in my opinion) as a web-browser extension.
  - If you want to make ACS references/bibliographies with Zotero, [you need to install this plugin first](http://goo.gl/4oPmZm).
- **ACS Style Guide #1** / **ACS Style Guide #2**.
